

*improve patient care for*  
**EARLY PREGNANCY LOSS**

**MOVE EPL TREATMENT OUT OF THE O.R.**

A health-economic study found significant savings for both facilities and patients when manual vacuum aspiration is provided in the emergency room or exam room.

**THE CONCERN:**

**900,000**

The number of patients that present to emergency rooms annually for early pregnancy loss (EPL).

**THE SOLUTION:**

**Ipas<sup>®</sup>  
M·V·A**

Facilities reduce costs and time, and provide improved patient-centric care, when manual vacuum aspiration is performed (MVA) in the E.R. or exam room.

# FACILITY SAVINGS

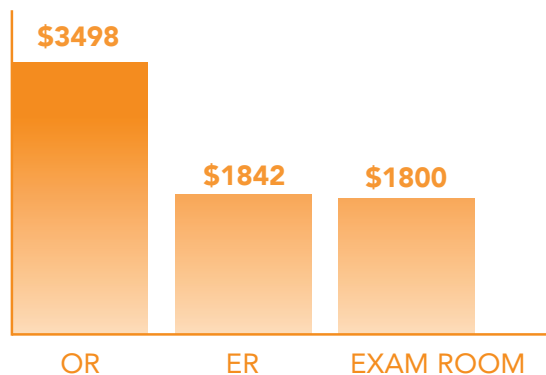

**DECREASES  
FACILITY  
COSTS**

**\$1650** COST REDUCTION  
PER PROCEDURE

Moving EPL procedures out of the operating room to the E.R. or exam room reduces cost from almost \$3500 to below \$1850 per patient.

**<50%  
SAVINGS**

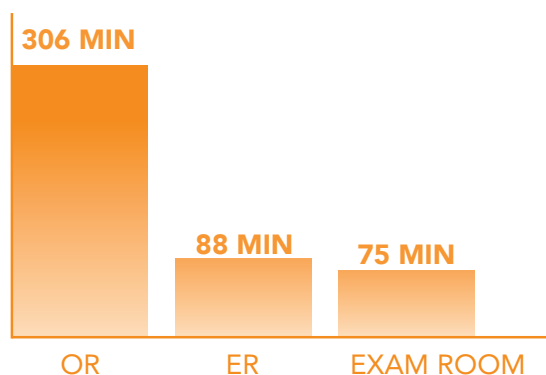

**REDUCES  
STAFF  
RESOURCES**

**231** STAFF MINUTES  
SAVED PER PROCEDURE

Prep, procedure, and post-care time is lower in E.R. or exam rooms. This optimizes OR staff resources for higher-acuity procedures.

**<4HRS  
SAVINGS**

# PATIENT-FOCUSED CARE

## Ipas® M·V·A *improves patient satisfaction*

### INCREASES ACCESS

MVA offers a more timely solution for 900,000 women presenting EPL in emergency rooms annually, who currently face delays and treatment options limited to the OR.

### EXPANDS OPTIONS

Offering MVA to patients in E.R. and exam rooms expands their care options, and empowers women to make informed decisions about their treatment.

### IMPROVES COMFORT

Presenting MVA allows patients access to a less invasive procedure that might better fit their preferences—such as choosing a same-day resolution or avoiding procedures that require general anesthesia.

PROVIDES  
IMMEDIATE  
ACCESS

+

INCREASES  
PATIENT  
OPTIONS

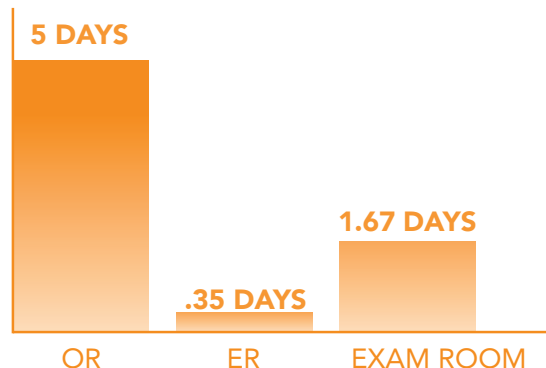

+

IMPROVES  
TREATMENT  
TIMES

**4.66** FEWER DAYS UNTIL  
TREATMENT COMPLETION

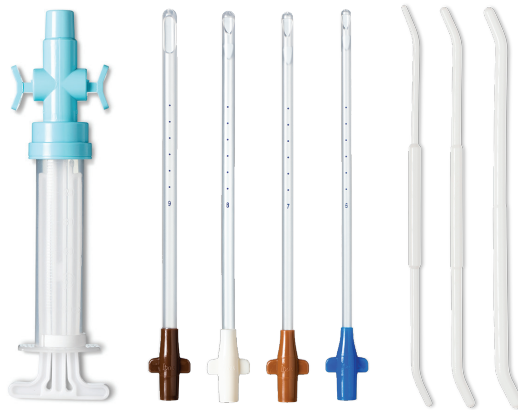

Overall, the experience of managing early pregnancy loss is improved for the patient. An MVA treatment means less time waiting for a resolution *and* faster treatment, which leads to increased patient satisfaction.

**72.3% REPORTED  
IMMEDIATE  
TREATMENT IN EXAM ROOMS**

# ONE SOLUTION ONE EASY KIT

FOR CLINICS, EMERGENCY, & EXAM ROOMS  
Sterile. Single-use kits. Pre-packaged.

## EACH KIT INCLUDES:

- 1 Ipas Double Valve Aspirator
- 4 Ipas EasyGrip® Cannulae (6, 7, 8, 9mm)
- 3 Denniston Dilators (5/6, 7/8, 9/10 mm)

All Ipas MVA products can also be purchased separately. Visit our website for full details.

“  
*I use MVA exclusively for all office-based procedures... The disposable kit makes it convenient for the ER, clinic, or office. It's quick, easy to use, and my patients appreciate having another option.*
